Clinical Advisory

To: EMTs, Paramedics, Advanced Paramedics, Call Takers, Call Dispatchers, Supervisors, Managers

c.c.: NAS Leadership Team

From: Medical Director

Date: October 19th 2014

Subject: **EBOLA VIRUS DISEASE – RECEIVING HOSPITALS**

Dear colleagues,

The Risk Assessment Tool for Ambulance Personnel outlines the management of patients suspected of having EVD.

You will note that, subsequent to discussion with a Consultant in Infectious Diseases in the National Isolation Unit, one of the outcomes is transport to a local Emergency Department.

Should that be the advice given, the patient(s) should be transported to the nearest ED as per the list overleaf. Such patients should not be transported to a hospital that is not on this list.

Yours sincerely,

Dr Cathal O'Donnell,
Medical Director.
